DESCRIPTION:
The UNO College of Sciences (cos.uno.edu) and Ochsner (www.ochsner.org) are launching a new summer research internship program to provide young scientists with hands-on experience working in high-functioning medical research labs at Ochsner. Work will be conducted over a six-week period in the summer, from May 30 - June 11, 2017. Interns selected for the program will receive a $2500 stipend.

In addition to working on a specified research project, interns will be paired with a physician or PhD for one-on-one mentoring, attend medical student lectures and grand rounds, and participate in other professional development activities. It is expected that the research project will result in a presentation and abstract publication.

POTENTIAL RESEARCH PROJECTS:

- Translational Cancer Research
  - Cancer stem cell and tumor microenvironment
  - Patient-derived orthotopic xenograft models
  - Prognostic and predictive biomarkers and translate preclinical discoveries into effective cure for cancer patients
- Pediatric Pulmonology Research
- ITR Transplant Lab
  - Role of myeloid-derived suppressor cells in hepatocellular carcinoma recurrence after liver transplantation
  - Frequency and function of NF1 mutations in hepatocellular carcinoma-implications for the use mTOR inhibitors
  - Lipid-overload induced alterations in hepatocyte cyclin D1 and IL-33 expression increases susceptibility to hypoxic injury
