Connecting iPad to UNOSECURE

iOS devices, such as the iPhone, iPod touch, and iPad, are equipped with Wi-Fi (wireless) network connectivity. Please use the following steps to connect to UNO's campus-wide unosecure wireless network.

1. On your iOS device, go to the Home screen and open Settings.
2. Under Settings, open Wi-Fi.
3. In the Wi-Fi Networks screen, check that Wi-Fi is ON. If not, tap the appropriate OFF/ON toggle.

Result: Available wireless networks will be listed under Choose a Network.

Note: A padlock icon by a network name indicates a password is needed to access that network.
4. Under **Choose a Network...** select **unsecure**.
5. Type in your UNO username and password and press Join.
6. On the Certificate screen, press **Accept**.
Result: You should see a check next to unosecure, indicating that you are now connected to the unosecure network.
7. To test your connection, open Safari and enter the address http://www.uno.edu.

Result: The UNO home page should load.

If you encounter any trouble, feel free to contact the Help Desk at (504) 280-4357 or by email at helpdesk@uno.edu. You may also stop by the Help Desk, located in the UCC Room 101.
