Workday Update: Pre-Award & Post-Award Teams

The University of New Orleans's transition to Workday has prompted the Office of Research to restructure our pre-award and post-award staff members into teams managing specific academic and non-academic units. This new method of serving the scholars and researchers at the University of New Orleans should streamline communications about grants, contracts, and sponsored programs throughout the application and award process.

In January, we transitioned to the team structure below:

Pre-Award

- [Rebecca Drake](#) serves the College of Science.
- [Kendy Martinez](#) serves all other academic and non-academic units.
- [Burt Neal](#) manages all sub-awards and internal award programs.

Post-Award

- [Jesse Sherrell](#) serves the College of Business and the College of Liberal Arts, Education, and Human Development.
- [Bing Leng](#) serves the College of Science, except the Dept. of Computer Science.
- [Charles Chaisson](#) serves the College of Engineering; the Dept. of Computer Science; and all other non-academic units.

You may review these updates on the [Office of Research Directory](#), which lists the full Office of Research team and how each staff member might best serve you.
