

Remote Terminal Server for Windows and Mac Users

Connecting to UNO's remote terminal server from a Windows computer.

To connect to our UNO Remote Terminal Server from a Windows computer you will need to use the Microsoft Remote Desktop application located under the Accessories folder from the Start Menu and have Windows Vista SP 1 or later. Anyone wanting to use Remote Desktop from off-campus should no longer connect via VPN.

1. Double click on the Microsoft Remote Desktop application located under Accessories from the Start menu.

- 2. Type in "remote.uno.edu" in the computer field as shown in the below picture.
- 3. Hit connect. We recommend not saving your login credentials but it is an option.

## Connecting to UNO's remote terminal server from a Mac.

To connect to our UNO Remote Terminal Server from a Mac you will need to use the Microsoft Remote Desktop application for Mac and have OS 10.7 or later. Anyone wanting to use Remote Desktop from off-campus should no longer connect via VPN.

- 1. Open the Microsoft Remote Desktop application.
- 2. The icon.
- 3. Click New.
- 4. For Connection Name, enter UNO Remote.
- 5. For PC Name, enter the name of our UNO Terminal Server remote.uno.edu.
- 6. Leave the "no gateway configured" as it is.
- 7. Please do not save your username and password.
- 8. Close the popup using the red circle in the upper left corner of the window.
- 9. To open the remote desktop session, double click on UNO Remote.
- 10. If you did not store your username and password, you will be prompted to enter your username and password.

You are now connected and have access to your I:, S:, all of the Office apps plus numerous others.
