The University of New Orleans offers an education for those who are full-time doers and all-time dreamers. Our campus is a place for those who know the future isn’t something you wait for... it’s something you build.
ABOUT THE COLLEGE OF SCIENCES

As one of the largest colleges at UNO, the College of Sciences (COS) offers diverse paths of study spanning the scientific disciplines of biology, chemistry, computer science, earth and environmental sciences, mathematics, physics, and psychology. Its seven departments and four research institutes partner with industry and government to conduct cutting-edge research, expand the frontiers of knowledge, and fuel scientific and business growth. Students work side-by-side with distinguished faculty; through small class sizes and a student-centered approach to learning, we foster an enriching and supportive academic community. With occupations in the STEM (Science, Technology, Engineering, and Math) disciplines estimated to grow 1.7 times faster than non-STEM fields, graduates of COS are trained in both academic scholarship and real-world skills to be the scientific leaders of tomorrow.

OPPORTUNITIES

Twenty student organizations offer ample opportunity for students to get involved, develop leadership skills, and attend professional and networking events. We know that learning does not just take place in the classroom and experiential learning is highly encouraged through the College of Sciences Undergraduate Research Program (COSURP), AMAI Summer Research Experience for Undergraduates Program, and classes that provide course credit for participation in research projects. Many faculty also offer paid and volunteer research positions to work alongside them and graduate students in their laboratories or in the field. Students are able to apply their skills in real-world applications through Internships such as the GE Software Engineering Apprenticeship Program (SWEAP). Opportunities are also available to earn course credits for interning with local companies and organizations.

ACCREDITATIONS

Computing Accreditation Commission of ABET
Greater New Orleans Center for Information Assurance (GNOCIA) designated a National Center of Academic Excellence in Information Assurance Education, in Information Assurance Research, and in Cyber Operations by the National Security Agency and Department of Homeland Security.
GRADUATE SCHOOL

Your next level is here.

We are the only public Carnegie-ranked research institution in New Orleans. Our faculty consists of experts and industry leaders. Our curricula are kept at the cutting edge by discipline-specific advisory boards of committed professionals. If you’re looking for a university primed to take you to the next level, you’ve found it.
