

UNO FOCUS:

Postdoctoral and Senior Research Awards
National Academy of Sciences, Engineering, and Medicine

All research opportunities are open to U.S. citizens; some are open to U.S. permanent residents and foreign nationals. They are actively seeking highly qualified candidates including recent doctoral recipients and senior researchers. Applicants should hold, or anticipate receiving, an earned doctorate in science or engineering. Awards are contingent upon completion of the doctoral degree. A limited number of opportunities in select fields are also available for graduate students. Degrees from universities abroad should be equivalent in training and research experience to a degree from a U.S. institution.

Applicants should contact prospective Research Adviser(s) at the lab(s) prior to the application deadline to discuss their research interests and funding opportunities.

DoD Duchenne Muscular Dystrophy Programs
Army (Army), Department of Defense (Defense)

Notice soliciting applications for this form of muscular dystrophy which results from mutations in the dystrophin gene that lead to an absence of dystrophin in muscle cells, allowing these cells to be easily damaged. Boys living with DMD experience devastating muscle weakness that affects the skeletal muscles, heart, and respiratory muscles. Symptoms of DMD typically develop prior to age 5, and by age 12 most patients are confined to a wheelchair. Currently, there is no cure for DMD and young men with this disease rarely live beyond their early 30s. The DMDRP aims to accelerate the transformation of these promising therapeutic ideas into clinical applications and support the training of new physician researchers to encourage careers in DMD research.

Required pre-applications are due August 12, 2020.

Naval Air Warfare Center Aircraft Division (NAWCAD) Office-Wide
Navy (Navy), Department of Defense (Defense)

Notice seeking proposals for research and development projects, which offer potential for advancement and improvement of NAWCAD operations. Readers should note that this is an announcement to declare NAWCAD's broad role in competitive funding of meritorious research across a spectrum of science and engineering disciplines.

Proposals are accepted any time until June 3, 2021.

ROSES 2020: Ocean Salinity Field Campaign
National Aeronautics and Space Administration (NASA)

Notice seeking proposals to clarify the role of salinity in ocean-ice interactions by characterizing salinity signatures and possible salinity-ice feedback mechanisms in rapidly-changing polar environments. Outcomes of this field campaign are also expected to inform the development of new concepts of future remote sensing capabilities that improve salinity retrievals in cold waters.

Optional notices of intent are due August 27, 2020. Step-2 proposals are due September 24, 2020. Approximately \$5.5 million is available over three years.

Request for Information (RFI): Research and Development Opportunities for Opaque Building Envelopes
Department of Energy (Energy)

RFI solicits feedback from industry, academia, research laboratories, government agencies, and other stakeholders on BTO's opaque envelope program and its future directions and priorities. To clarify these, BTO has developed a report that is structured around five key areas of technology R&D. The report identifies current envelope characteristics, R&D opportunities, integration approaches, and implementation pathways. BTO is requesting feedback on each of these areas. BTO is also requesting feedback on planned technical objectives, technical targets, tools, overall R&D activities, and estimates of program impacts.

Responses are due July 20, 2020.

Request for Information on Research and Development Opportunities for Windows
Department of Energy (Energy)

Notice soliciting feedback from industry, academia, research laboratories, government agencies, and other stakeholders on BTO's windows R&D and its future directions and priorities. To clarify these, BTO developed the RDO report, which is structured around four key areas. The RDO report identifies opportunities and challenges, technology development, integration, and implementation.

Responses are due July 20, 2020.
