

UNO TRANSPORTATION INSTITUTE

UNOTI Guest Lecture

“Avenues for Autonomous Delivery of Freight in Urban Environments”

Haggai D. Davis, III

Graduate Research Assistant
C2 SMART
NYU Tandon School of Engineering

Friday, September 29, 2023

2:30 p.m.—3:30 p.m.

Milneburg Hall, Room 273

Please join UNOTI for a conversation with **Haggai D. Davis, III**

About the Speaker: In 2015, after completing a BS in Physics and Astronomy at Louisiana State University, Haggai D. Davis III looked for a new challenge and found it in the field of Transportation Engineering. In 2019, he earned an MSCE from LSU with research in the field of Hurricane Evacuations and Driver Behavior in an Autonomous Environment. Haggai moved full-time to Arcadis after having first interned for the company in Summer 2017.

However, he was not done yet with academia. In Fall 2020, Haggai started a Ph.D. at NYU Tandon further specializing in Transportation Systems. His research focuses on the future of urban freight delivery in New York City by studying how electrification and automation will change it.
