

Connecting to UNOSECURE on a MAC OS X

The following instructions and general notes are for MAX OS X and Apple users. After the setup is completed, you will need to login to the UNO-Domain only for the initial connection. MAC OS X will retain your login credentials, and your system will automatically reconnect to the domain every time you connect to the UNO wireless network. This will remain in effect as long as your UNO account is active or until your password changes, at which time you will have to login with the new password. Since your laptop will connect using your credentials, anyone borrowing your laptop will be identified as you. Please be careful since you are responsible for following all UNO policies regarding the use of the UNO network with your account. **If you encounter any trouble, feel free to contact the Help Desk at (504) 280-4357 or by email at helpdesk@uno.edu. You may also stop by the Help Desk, located in the UCC Room 101.**

1. Click the Wireless Icon on the desktop.
2. Select **unosecure** or if you do NOT see it select **Wi-Fi Settings....**

3. Enter your **UNO username** and **password** and select OK.
Please check the box **“Remember this information”**.

Enter a name and password for network
"unosecure"

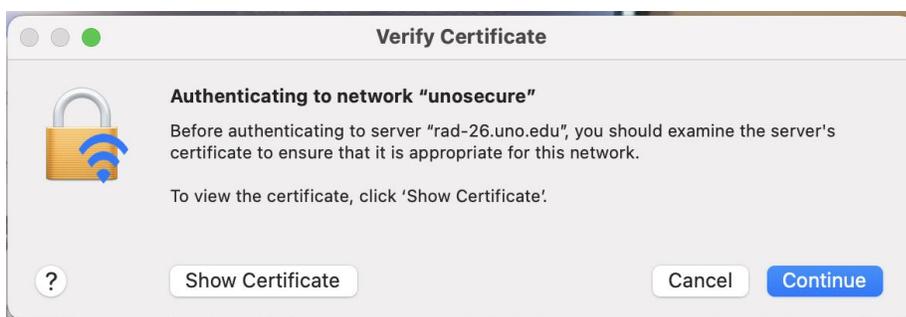

Account Name:

Password:
